I am a Computer Science graduate at CSU, Northridge. I am interested in career opportunity for software engineering such as mobile app/web/database development. I'm willing to take on new technologies to improve my own skills and contribute to any future projects.

EXPERIENCE

SEPTEMBER 2017 – MAY 2021

TUTOR, CSUN PHILOSOPHY DEPARTMENT

I tutor more to the formal logic side, for our Computer Science major. I did well in the course and my teacher thought I could help others learn. It ended because I graduated.

JANUARY 2018 – DECEMBER 2019

TUTOR, CSUN MATH DEPARTMENT

For a time, I tutored math at CSUN. I tutored for Calculus I – III, Probability, Differential Equations, and Linear Algebra. It was a first for me trying to help someone else understand something I understood.

SEPTEMBER 2020 – MAY 2021

COOKFLEX, SENIOR DESIGN PROJECT

Created a mobile app for Android in Android Studio. I worked on the backend with Firebase, a service by Google for mobile and web applications, to manage users and their data, like images and emails.

JANUARY 2020 – MAY 2021

TEXT-TO-SPEECH BOT, CSUN ACM PROJECT

Utilizing Python and its various libraries, we created a bot for converting a person's speech to text. I helped in creating the model for the bot and then testing it with PyAudio

EDUCATION

MAY 2021

BS IN COMPUTER SCIENCE, CALIFORNIA STATE UNIVERSITY NORTHRIDGE

GPA 3.99

Member of the Association for Computing Machinery(ACM) chapter since 2020

SKILLS

- Experience with Python Machine Learning
- Web experience with HTML, CSS, JavaScript, React
- Deployment with Meteor.js and AWS
- General Programming Experience in Java
- Database experience with MySQL and PHP
-
